DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1, 2, 3, 4, 5, 6, 9, 10, 11 are rejected under 35 U.S.C. 102(a) as being anticipated by Dal Ferro WO 02/096782.

Dal Ferro discloses a similar device comprising a(n):

- Fixed casing (13)
- One or more frames (3)
- Doctor blade (5)
- Groove (fig. 6 or 21) made in a blade holder (4), the blade holder having an 'L' shape, and also having a rectangular cross-section (fig. 3), said blade holder having first side fixed to said frame and a second side facing said surface to be scraped
- Fastening means (43)
- Adjusting means (6)
- Elastic means (21)

Art Unit: 3651

3. Claims 1, 7, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Brink USP 6179114.

Brink discloses a similar device comprising a(n):

- Fixed casing (38)
- One or more frames (46)
- Doctor blade (C2/L44)
- Groove (40) made in a blade holder (fig. 3)

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7, 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dal Ferro WO 02/096782 in view of Isaacs USP 5865997.

Dal Ferro discloses all of the claimed limitations, but does not disclose the groove (fig. 21), holding the blade, having a 'U' shaped cross sectional profile.

Isaacs teaches the use of a groove (40) having a U-shaped cross sectional profile for the purpose of providing for a means to secure and hold a conveyor belt scraper blade (C2/L40+).

It would have been obvious to one having ordinary skill in the art at the time of the invention to have employed the use of a groove having a U-shaped cross sectional profile, as

Art Unit: 3651

taught by Isaacs, in the device of Dal Ferro for the purpose of providing for a means to secure and hold a conveyor belt scraper blade.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
